

Index—California and Western Medicine

Volume XXIV, January to June, 1926

CALIFORNIA AND WESTERN MEDICINE has grown to a size where it is no longer possible to bind the twelve issues of one year in the same volume. Therefore, beginning with this year, there will be two volumes a year, one covering the six issues from January to June, inclusive, and the other from July to December, inclusive. Volumes will be numbered serially as heretofore, and each volume will be supplied with an index.

In preparing the index to this volume, we have followed the method of an alphabetical subject and author index combined. It is not as full perhaps as it should be, because it would take most of the time of an indexing secretary to prepare as complete an index as we would like to see. However, it is full enough so that any major subject discussed during the year, and the names of all authors, may be readily located.

An ever-enlarging circle of physicians who read systematically are finding the Cumulative Index published quarterly by the A. M. A., and sold for a nominal subscription, of incalculable value. Everything published in CALIFORNIA AND WESTERN MEDICINE, as well as all other worthwhile medical magazines, is completely indexed in the "Cumulative" in a most complete author and subject index. Our editorial staff use this volume constantly.—EDITOR.

A

- ABUSE OF RECIPROCITY (L. E. Mahoney), 478.
ADRENALS, the role of, in the preventive effect of certain drugs and nerve mechanisms in the production and treatment of certain edemas (P. J. Hanzlik), 33.
AMEBIASIS, Chronic, The Diagnosis of (W. T. Davidson), 768.
ANESTHESIA, REGIONAL (C. E. Phillips and Roy H. Johnson), 37.
ANGINA, VINCENT'S (H. E. Miller and N. Epstein), 622.
ANTAGONISTIC functions of the uterus in relation to regional nerve-blocking (Harry Theodore Cooke), 55.
ATRESIA OF ESOPHAGUS, Congenital (S. Schiro), 505.
